

# ***E-Z FIT PIPE ALIGNMENT CLAMPS***

**(E-Z2SS, E-Z4SS, E-Z8SS & E-Z12SS)**

## **General Information**

The E-Z Fit Clamp is designed to cover a wide range of pipe or tubing jobs. The E-Z Fit clamps have an operating range of 1" – 12" (25.4 – 304.8mm). Thin wall tubing to tubing, tubing to tee, tubing to elbow or tubing to valve are no problem for the E-Z2SS Clamp. The Clamps come with stainless steel pads and screws for stainless steel or other specialty applications.

## **Installation Instructions**

Back of the thumbscrew of the E-Z Fit Clamp until the threaded end of the thumbscrews are inside of the pipe rest and will not contact the tubing, when the clamp is closed. Turn the "T" handle at the top of the clamp counterclockwise until the clamp will slide over the end of the pipe or over the top of the pipe. Turn the "T" handle clockwise until the pipe rest is snug against the surface of the tubing clamp will slide over the end of the pipe or over the top of the pipe. Turn the Thumbscrews clockwise they are snug against the surface of the tubing. Release the clamp from the tubing by turning the "T" handle counterclockwise. Slide the clamp over the end of the pipe to the desired position and retighten the "T" handle

Back two of the thumbscrews one full turn and place the fitting in the clamp. Adjust the thumbscrews in or out until the desired Hi-Lo is achieved.
